# Pot-Grown Roses for Summer Planting

In our own retail trade we have, during the past few years, found an increasing demand for Roses for outdoor planting, sufficient to make it interesting to carry stock in shape for this purpose, and this season we have extended our supplies, so that we also will be in position to execute trade orders in the choice varieties listed below.

These are all field-grown plants which have been potted into 5 or 6-inch pots (according to the growth of the variety) during the winter months. They have been stored in cold houses and cold frames and are in the best possible condition to turn over to your retail customers for outdoor planting, giving an entirely different result from stock carried over winter in storage.

# POT-GROWN HARDY PERENNIALS

We will carry the following varieties in pot-grown plants throughout the summer in such condition that they can be planted at any time. This is good stock to keep in mind, as it frequently happens that summer plantings are required to cover failures and misses in other stocks. Many of these varieties will still give an account of themselves and make a good showing this season, while all, if planted now, will be in fine shape for next year's flowering.
